

Bill Carney User Manual

Version 1: CEO 1.0 February 10th 2025

Myers Briggs - INTP (Logician) is a personality type with the Introverted, Intuitive, Thinking, and Prospecting traits. These flexible thinkers enjoy taking an unconventional approach to many aspects of life. They often seek out unlikely paths, mixing willingness to experiment with personal creativity.

Overview

I'm an INTP with a strong analytical mindset, an insatiable curiosity, and a deep appreciation for transparency, efficiency, and growth. I thrive when exploring ideas freely, questioning assumptions, and uncovering the "why" behind complex problems. While I believe perfection is the enemy of progress, I value meaningful connections and enjoy solving challenges through collaboration—especially when there's room for creativity and discovery.

How I Operate

Core Values

- **Truth-Seeking** – I love breaking down complex problems, analyzing data, and challenging assumptions. I care less about being "right" than about the process of collective discovery.
- **Curiosity Over Convention** – I thrive when questioning the status quo and exploring unconventional solutions. I'd rather ask, "what if?" than accept "that's how we've always done it."
- **Humility** – I prioritize results over recognition and appreciate the same in others.
- **Transparency & Logic** – I believe in clear, no-BS communication and connecting the dots to give people context. If something doesn't make sense, I'll question it.
- **Intellectual Growth** – I believe progress comes from experimentation, iteration, and learning from failure. I'm constantly looking to stretch my thinking (and others').
- **Empathy** – I care deeply about people and aim to create meaningful work experiences. I enjoy sharing what I've learned, especially in an informal, idea-exchange way. I'm working on improving structured mentorship.

How I Work Best

- **Independent First, Then Collaborative** – I like to explore ideas before bringing them into a discussion. I'll collaborate when it leads to sharper insights, but I don't need group consensus to move forward.
- **Idea Bursts Over Routine** – I don't operate on a predictable, steady workflow. My best thinking happens in deep, intense focus sessions, often at unexpected times.
- **Work Anytime, Think Always** – I get bursts of inspiration at odd hours. If I email late at night, don't feel pressured to respond immediately—I'm just capturing thoughts while they're fresh.
- **Autonomous Problem-Solving** – I prefer figuring things out myself first, but I always welcome a good intellectual debate.
- **Knowledge Sharing Over Formal Coaching** – I love discussing ideas, explaining concepts, and brainstorming solutions. Coaching in a structured way is a work in progress.
- **Finds the Funny in Everything** – I don't take myself too seriously. If something ridiculous happens, I'm already turning it into a joke—usually at my own expense.
- **Self-Sufficient & Ownership-Driven** – I take pride in my work, expect high-quality results, and push myself to be as informed as possible.

How to Work with Me

Communication Preferences

- **I prefer communication via Text & Teams** – It helps me respond instantly. I believe email is meant to CYA – or maybe I’m not that good at it.
- **I’m a non-verbal processor** – If I seem quiet or intense, I’m likely thinking, not disengaged.
- **I value directness** – Clarity over sugarcoating. No need to couch words—just say what needs to be said.
- **Situational Leadership (SL2)** – I’m actively using it to adapt my communication and leadership style based on the needs of each engagement. Expect me to adjust my approach depending on the context and the level of direction or support needed. Feel free to correct my approach.

Meetings & Collaboration

- **Let’s Make It Worthwhile** – If a meeting has no clear purpose or action items, I’d rather use that time elsewhere.
- **Align Early, Then Move Fast** – I like discussing strategy upfront, then having the freedom to execute.
- **Follow-Through is Key** – I sometimes get caught up in new ideas before closing the loop. A nudge is always welcome. If we agree on something, I expect it to happen. If something changes, communicate it.

Feedback

- **Honest feedback is a gift** – I appreciate blunt, constructive input and will give the same in return.
- **I need to know my blind spots** – Awareness fuels growth, If I’m missing something, tell me—I’d rather fix it than let it fester.

What Frustrates Me

- **Lack of clarity** – I operate best when I know the “why” and expected outcomes.
- **Inefficiency & Pointless Meetings** – Let’s not meet just to meet.
- **Rigid Thinking** – “We’ve always done it this way” isn’t a good enough reason.
- **Overly Structured Processes** – I prefer flexible frameworks over bureaucratic rules.
- **Lack of follow-through** – If something is committed to, I expect it to be done or communicated otherwise.
- **Being set up to fail** – I thrive when stretched but need the right support to succeed.

How to Connect with Me

I’m actively traveling to meet with clients and teams. If you’d like to schedule time:

- **In-Person Meetings** – If I’m in your area or you’re booking a client meeting, I’d love to join and grab a 1:1 coffee while I’m there.
- **Coffee / Cocktail Chats** – If I happen to be nearby, let’s meet. If not, we can still connect virtually.
- **Virtual Meetings** – My calendar is always up to date. [[Click here to book time with me.](#)]
